Goal

Seeking a challenging full time or contract position of a Junior Web Developer. I'm an ambitious problem solver with a passion for online businesses, and would like to join a team of like-minded developers.

Strengths:

Web Design Skills

- Develop, code and test web base software using primarily HTML, JavaScript, CSS and CMS systems.
- Keeping up to date with current and emerging web technologies through relevant blogs, publications and events.
- Integrating new technologies into existing web properties.
- Work with quality assurance team to resolve issues resulting from pre-live testing.
- Collaborate with developers and operational teams to create and prioritize user requirements.
- Ability to perform requirements, data analysis and coverage testing.

Personal Skills

- Always positive, regardless of the challenge ahead.
- Willingness to work with emerging alternative technologies.
- Developing professional relationships with customer.
- Can work in fast - paced environment while maintaining attention to details.
- Willingness to take ownership of projects and see them through to completion.
